Thanks for the heads up on all that, Rick!

As an update:

The Class V has been cleaned up and given a QC check, so I think it is ready to go.

In the RTC, I notice that something strange has happened to the heading of the permit change section (the font is very large and inconsistent). There still are a few comments and Response #93 is highlighted.

Also, I updated the responses to #63 and 68, which still referred to iterative monitoring and modeling. Someone might want to take a look at those.

Here are my thoughts for today:

I thought we could focus on finishing up the permits today, if possible. I will convert the permits and AE ROD to pdfs and put them in a signature folder on our UIC SharePoint site so they are ready for Darcy's signature. I will share the folder with Darcy once it is ready to go.

Rick, Thanks for making those changes in the Class III permit yesterday. Are you finished with the Class III permit? How are you doing with the Class V permit?

Once I finish my edits to the Class III permit, I will turn to the EJA and RTC.

Once the RTC is final, I will convert it to pdf and add Powertech's comment tables that Mai, Rick and I edited to include responses. Those table will be an appendix to the RTC, right?

Then I can focus on the AR after that.

Anything I missed?

Thanks!
